The Graduate Research and Discovery Symposium happens every year as part of Clemson's Research Week. It is the opportunity to showcase a variety of research and service done by graduate students from each of the colleges in Clemson University's Graduate School. GRADS is a chance for Clemson's graduate students to present their work in a symposium-like environment, as well as an opportunity for our the Clemson community to learn what their peers in other fields are researching, creating and producing. Presenters can also win CASH PRIZES for their presentations!

What is GRADS?
The Graduate Research and Discovery Symposium happens every year as part of Clemson's Research Week. It is the opportunity to showcase a variety of research and service done by graduate students from each of the colleges in Clemson University's Graduate School. GRADS is a chance for Clemson's graduate students to present their work in a symposium-like environment, as well as an opportunity for our the Clemson community to learn what their peers in other fields are researching, creating and producing. Presenters can also win CASH PRIZES for their presentations!

What to submit?
Submitting for GRADS is easy! If you have presented a poster or lecture at a conference in the past, you can submit the same abstract as long as it has not been presented at a previous GRADS event. We will send you a formatted citation after the conference so that you can add it to your resume! If you are interested in participating in GRADS, please fill out the following form by March 5th.
